Leverage Technology to Grow Your Ministry

Imagine Mobile Church is your partner to easily connect, train, and grow your people in the Cloud. By integrating mobile community, church administrator tools, cloud-based training and more, your church can focus on making more disciples and reaching your community.

IMAGINE MOBILE Church

Connect, Train and Grow Your People in the Cloud

CONNECT

◉ *Synchronize Calendars* - Use one calendar to manage activities for staff, teams and groups. Simplify planning, execution and accountability.

◉ *Maximize Teamwork* - Create synergy with staff, volunteers, and members from your church in the cloud. Connect through any device: smart phones, tablets and computers.

◉ *Communicate Better* - Reach more people faster by leveraging text messaging technology and group emails. Maximize smart and innovative communication inexpensively.

◉ *Automate Proactive Notifications* - Communicate church activities, events, training, and tasks immediately. Quickly notify staff, users, teams, groups and campuses of plans and changes.

TRAIN

◉ *Create Classes & Small Groups* - Painlessly build and manage groups, classes, and ministry teams. Upload group documents and presentations.

◉ *Direct Your Training* - Design, manage, and deliver customized online training programs to users, groups, staff, or campuses. Create courses, sessions, modules, quizzes, and tests.

◉ *Integrate Video and Audio-based Learning* - Import multiple training files to increase and enrich learning. Import files from YouTube, Vimeo, iTunes, etc.

◉ *Automate Proactive Notifications* - Develop more trainers, volunteers, and teachers by creating a culture of spiritual reproduction. Systematically help your people grow and multiply your church by learning the Cloud.

GROW

◉ *Increase Online Giving and Measure Progress* - Seamlessly implement and track online donations. Help your people schedule, view and track their donations from the Cloud.

◉ *Save More Money* - Reduce the overall cost of managing your ministry operations. Use your resources for what matters most: changing lives.

◉ *Delegate Responsibilities* - Leverage multiple administrative levels and easily automate important assignments. Painlessly share the workload with your entire team.

◉ *Multiply Faster* - Duplicate existing groups, teams, and campuses. Appoint new administrators quickly. Create training and financial reports to accelerate decision-making.

Security:

Our secure Software as a Service (SaaS) application is predictable, resilient and reliable. From our inception, the highest levels of security formed the foundation of our philosophy and technical infrastructure. Our strategic partners also meet or exceed industry standards for internet security to keep your data secure.

Pricing:

We use a simple subscription-based pricing model based on the number of users. We work with churches to provide special pricing and flexible payment options based on their average monthly attendance. We exist to serve churches and their people.

Accept, Manage, and Track Online Donations and Donor Information

Can donations made to your church begin to soar? Studies show a direct correlation with integrating online giving tools and increased church donations. When you automate how people make donations to your ministry, giving regularly becomes easier. At Imagine Mobile Church we want to help churches develop innovative solutions for accepting, managing, tracking, and reporting online donations.

Improve Event Visibility and Ministry Planning with Web-Based Calendars

Start synchronizing calendars and tasks. What would you do if every event in your church was visible to those who needed to see it the most? How would it help your ministry if you were be able to create calendars for every active area of your church? When it comes to assigning tasks to individuals or groups, what if there was a way to proactively place important tasks on someone else's personal calendar for immediate action? With Imagine Mobile Church maximizing calendar visibility and delegating tasks is now easier than ever before.

Build, Manage, and Promote Small Groups and Discipleship Classes Online

Whether your church integrates small groups, volunteer teams, choir, band, dance teams, Sunday School, children's ministry, youth ministry, training centers or regular weekly classes, Imagine Mobile Church can help you simultaneously manage all of these groups and classes online. We help you quickly create multiple groups and classes while easily adding people with only a few simple clicks.

Leverage Online Training to Make Disciples and Grow More Leaders

Are you maximizing all possible training platforms throughout your entire church? Imagine Mobile Church can help your ministry synchronize global training and development. Whether you want to train your local church body or help develop missionaries overseas, we can help you create online training programs to make disciples and grow more leaders.

Your people are on the move and more mobile than ever before. If you cannot meet with people regularly, due to travel schedules or other commitments, how can your church continue to help them grow in their faith?

The answer: You invest in training your people from the Cloud. What happens when you invest in developing every member of your ministry? Your people grow. Thus, when your people grow, so does your church.

Develop Effective Systems to Help Random Guests Become Active Members

When God brings new people to our church family, are we doing a good job getting them connected to our people? This is a difficult question indeed, but pastors cannot afford to ignore it.

The good news is that technology now serves to help pastors and churches connect with their guests and stay connected with their people.

Purposeful connections make it easy for your people to stay connected to your church. Therefore, when your people stay connected, they grow and thrive spiritually. We are committed to helping you and your team develop innovative ways to intentionally keep your people connected in a relevant way within your ministry and with one another.

Improve Communication with Everyone in Your Church

How do you capture the attention of your people when everyone around them is working twice as hard to capture their time, their resources, and their energy? How can you and your team more efficiently communicate with your people using innovative church technology solutions?

The answer is to automate your communication by regularly connecting with your people on their cell phones, tablets, and computers. Imagine Mobile Church serves to help your ministry make communication easier and more effective for everyone in your church body. We have church communication solutions to help church leaders.

Help Church Administrators Love Their Jobs!

Do churches need automated church services? The short answer is "yes." Your church cannot innovate until you automate existing church systems. When churches decide to integrate innovative ministry tools into the life of their church, good things happen. Church ministry moves fast and so does technology. When you consider the best web-based church management software reviews, systems automation is always the top priority.

Your church must both innovate and automate. Why? People are counting on you for their spiritual health. If a church is too busy managing administrative tasks, it will be limited in her ability to minister to the people. Invest in automated church solutions to give people more of your time.

Recruit, Train and Manage Church Volunteers Faster

Church software makes church recruiting and communication easy. Imagine Mobile Church serves churches by identifying key ministry operational challenges and providing effective church management solutions to solve these frustrating issues.

We love to help churches focus on their people while we focus on providing relevant church volunteer recruiting tools and church follow-up solutions.

Recruit church volunteers faster and create online systems to recruit, train, and manage church volunteers. When churches have up-to-date online tools, they can serve their people better and faster.

When you need to form ministry teams quickly, what do you do today? Is your only option to ask a group of church members to make 20, 50, or 100 phone calls? If this is a reality in your church, then you will be pleased to know that Imagine Mobile Church helps you find and recruit church volunteers faster and more efficiently.

Deploy Chatrooms, Broadcast Video, and Facilitate Web Conferences

Group Chats are now a reality with Imagine Mobile Church software. Let your people create a buzz while connecting through online mobile chat rooms. You can create public, password protected, and invitation-only chat rooms to help your people stay connected.

Connect users together on your website. Imagine Mobile Church enables your site users to chat with each other as well as their gTalk (Google Talk) friends. They can share pictures, collaborate together with write on boards, broadcast videos, share screens, play games, and a lot more while maintaining their privacy.

Leverage broadcast audio/video and web conferences to conduct meetings, host workshops, expand on current teaching needs, provide additional training. There is no need to purchase expensive web conferencing solutions. With Imagine Mobile Church you can create unlimited web conferences from your desktop or directly from your smart phone.

Automate Managing Events, Classes, and Child Check-in

With the help of advanced technologies, you can now manage events, classes, and child check-in systems with high efficiency and reliable security. Managing events helps you keep track of participants as they register and print labels.

When classes are used with check-in systems, attendance is easier to track. If attendance requirements are important to the instructor we can help you manage and track student attendance. All of this can be accomplished through computers, tablets, and mobile check-in stations.

When it comes to providing a safe and secure environment for your children's ministry, nothing can be more important than the security and protection of children. Automating child check-in systems is a strong step in the right direction. Imagine Mobile Church facilitates this important need without complicating your existing systems.

How Does Your Church Benefit from Partnering with Imagine Mobile Church?

1. Maximum Internet Security

Every decision in the development of this software was made with the highest standards of security. The technology used to develop this solution makes the system secure against hacking and SQL injections, which is one of the biggest issues in web applications today.

2. Fast User Deployment

Integrating SaaS-based applications is one of the fastest technology implementations available for your ministry. With Imagine Mobile Church you can leverage this benefit effortlessly throughout your entire organization. Since no software installation is ever required, you can deploy our solution quickly to individuals, teams, and large groups of users.

3. Unlimited Global Access

Your users can access Imagine Mobile Church from anywhere, wherever an Internet connection is available. Our solution helps you stay connected to your people anywhere and everywhere with the unprecedented accessibility and security of the Cloud.

4. Easy Learning Curve

Imagine Mobile Church is simple in design and very easy to learn. We believe that technology should be an enjoyable experience rather than complex and difficult to learn. Our solution is designed around the user experience.

We listen carefully to our customer's needs and relentlessly pursue improving our customer's overall experience.

5. Significant Cost Savings

Subscription-based models require less up-front costs than your traditional software applications. There is no need to organize complex implementation teams or spend countless hours planning the phases of your deployment or costly hardware requirements. Our solution totally eliminates this dilemma. You will not have to design a new infrastructure, purchase expensive hardware, or hire additional support staff.

6. Minimal IT Risks

Subscription-based models not only require less upfront costs and zero hardware; they have proven to carry significantly less risks for your IT staff.

Training is reduced from studying large boring manuals to watching friendly screenshots and navigating through simple icons.

With Imagine Mobile Church we also take care of protecting your user data while maintaining experiential consistency with every interaction.

7. Painless Upgrades

Churches no longer need to work weekends to launch new upgrades, at least not with Imagine Mobile Church. There is no need to purchase expensive equipment, hire expensive consultants, or plan for worst case scenarios when receiving future upgrades. We make upgrades totally painless for your ministry. We take care of these issues while most of your team is sleeping.

8. Unlimited Scalability

Whether your ministry has less than twenty-five users or more than 25,000 users, one campus locally or ten campuses internationally, Imagine Mobile Church is ready to serve your entire team. Our ability to serve organizations of all shapes and sizes gives our customers a unique competitive advantage.

9. Guaranteed Performance

Since your IT department is free to focus their energy on other projects, SaaS performance is no longer on their radar. We take care of all reliability and performance concerns right away.

10. Data Security

Your data is secure. Rest assured that automatic daily backups are a regular function of Imagine Mobile Church. Protecting your data is something we take seriously. Taking extra measures to keep your information completely secure and readily available is our top priority.
